Division Borg-Warner Corporation, 2195 South Elwin Road, Decatur, Illinois 62525

## SERVICE BULLETIN

July 1982

### #A1-82

TO: All Registered Manual Holders

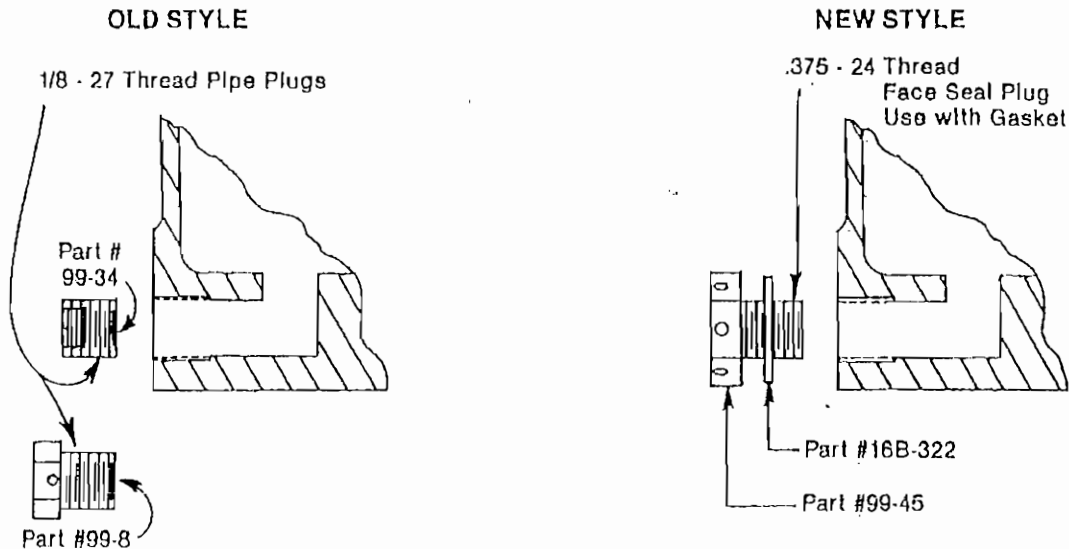

SUBJECT: Drain Plugs. Model HA Carburetors

TIME OF COMPLIANCE: Next Overhaul or Owners Option.

Some difficulties were experienced in removing the recessed allen type drain plugs, Part #99-34. The design has been changed to use a face seal type Part #99-45 with Gasket #16B-322.

THESE ARE NOT INTERCHANGEABLE.

—Note the difference in thread—

Pipe Plug style drain plugs and face seal style are not interchangeable. It is easier to remove and install the #99-8 Hex Head type when you service the old style.
