TEMPEST INTRODUCES DASH II OIL FILTER

GREENVILLE, SC — In response to customer demand for a shorter version of the popular Tempest oil filter, Tempest today announced the introduction of its Dash II oil filter. The new filter has all the features which have made the Tempest oil filter so popular, including the magnetic secondary filtration system, the by-pass valve PC housing and higher burst pressure. The Dash II is 5/16" shorter than competitive filters, making it the shortest oil filter on the market. Although it is the shortest filter, the Dash II has maintained more filtration media than competitive filters.

"Certain engine applications make oil filter installation and removal very difficult" stated John Herman, Vice President of Sales & Marketing for Tempest. "So we have responded to customer demand and are proud to provide our Dash II oil filter," Herman stated. The Dash II is currently available as the AA48108-2 and AA48110-2 and is offered in Tempest's popular six-pack or individually. The Dash II oil filter and other Tempest products are available from Tempest's network of distributors listed on their website at www.tempestplus.com.

Tempest Dash II Oil Filter
